

Graffiti Deterrent Listing

FOLIAGE:

These are vines most commonly use by the City to deter Graffiti.

1. Ficus Vine (Creeping Fig)

Attaches itself to wood masonry and metal.

Grows in sun or shade.

Species include: Quercifolia, miniature Oak like leaves, Variegata, standard size leaves, and Minima, short and narrow leaves.

Prune as needed to support growth and weight.

2. Vining Bougainvillea

Stems need to be tied to supporting wall.

Comes in various colors.

Long needle like thorns on stems.

Prune as needed to support weight and to direct growth. Will need to be reattached when needed.

3. Boston Ivy

Clings to surfaces easily.

Think twice before planting if you don't have time to care for it. It can creep under sidings and hasten the deterioration of wood and mortar.

Goes dormant in winter (looses leaves).

Must prune each dormant season to restrain spread.

These are shrubs most commonly use by the City to deter Graffiti. Shrubs are not vines and several may need to be planted to cover the desired area.

1. Abelia

Grows 3-5 feet tall high and wide.

Needs constant trimming to keep at desired height and width.

2. Escalonia

Grows 8-10 feet high and wide.

Needs constant trimming to keep at desired height and width.

3. Rhapsolipis

Grows 6 feet tall and 8 feet wide.

Needs to be trimmed to desired height and width.

4. Natal Plum

Has needle like thorns on stems.

Grows 5-7 feet tall and same as width.

Needs trimming to keep at desired height and width.
